5 YEAR CAPITAL PLAN

25th AUGUST 2026

The following is the update to the summary of the rolling 5 Year Capital Plan for the Echunga Golf Club. The Plan is a road map that outlines the activities and the associated financial requirements for the club over the next 5 years. The Plan, captures items such as equipment replacement, major maintenance, risk mitigation, and aspirational improvements to the Club. The process is dynamic, and priorities will change due to cost, risk and members needs from one year to the next. Noting that the major expenditure over the next 5 years continues to be water security and irrigation upgrades. We are currently working on developing the scope of the works and costings which will likely change the value and timing of the expenditure.
